

Lab Exercise 2 (week3)

Due date: Thursday, Feb 4 midnight.

- Save the file as **wk3_excercise.html**
- Upload it to: my.gblearn.com under:
- public_html/comp1223/lab/practices/wk3

The objective of this exercise is to know how to:

1. create multiple headers.
2. create inline elements with absolute path.
3. create link to relative paths.

Create a web page as follows:

1. Create header 1 to display Your Name.
 2. Create header 2 to display your student id.
 3. Draw a horizontal line.
 4. Create header 3 to display: The name of your college:
 - Create inline element (absolute path) in bold to <https://www.georgebrown.ca/>
 5. Draw a horizontal line.
 6. Create a link to your index.html file (relative path)
 7. Draw a horizontal line.
 8. Create a link (relative path) to your picture in the asset directory.
 9. Draw a horizontal line.
- Include validation script at the bottom of the page.
 - Run the validation script to ensure there are no errors.

Check:

- ☐ [Did I save the file correctly?](#)
- ☐ [Did I upload it to the correct folder?](#)
